

UNITED STATES PATENT AND TRADEMARK OFFICE
CERTIFICATE OF CORRECTION

PATENT NO. : 7,381,696 B2
APPLICATION NO. : 10/074814
DATED : June 3, 2008
INVENTOR(S) : Hubert et al.

Page 1 of 1

It is certified that error appears in the above-identified patent and that said Letters Patent is hereby corrected as shown below:

lines 36-40
Col. 8, replace claim 1, (incorrect claim) with the following claim:

1. A method for treating a non-neutral pH hazardous material spill comprising:
producing a slow draining non-neutral pH foam by foaming an aqueous foamable concentrate with non-neutral pH aqueous liquid, the concentrate being tolerant to the non-neutral pH of the aqueous liquid in that the non-neutral pH aqueous liquid continues to drain slowly during treatment from the non-neutral pH foam after being deployed over a non-neutral pH hazardous material spill;
controlling a pH of the non-neutral pH aqueous liquid to be opposite to a pH of the non-neutral pH hazardous material spill; and
deploying the non-neutral pH foam over the non-neutral pH hazardous material.

lines 41 and 42,
Col. 8, replace claim 2, (incorrect claim) with the following claim:

2. The method of claim 1, wherein the pH of the non-neutral pH liquid is controlled to be less than 4.5 and form an acidic foam that is deployed over caustic spills.

lines 43-45,
Col. 8, replace claim 3, (incorrect claim) with the following claim:

3. The method of claim 1, wherein the pH of the non-neutral pH liquid is controlled to be greater than 9.5 and form a caustic foam that is deployed over acidic spills.

In claim 9, column 9, line 6 delete "as a s continuous", and insert --as a continuous-- in place thereof.

In claim 25, column 9, line 38, delete "no more than 20% by volume", and insert --no more than 10% by volume-- in place thereof.

This certificate supersedes certificate of correction
issued February 17, 2009.
